SPECIAL ISSUE

THE PROCEEDINGS OF THE 7TH INTERNATIONAL PALYNOLOGICAL CONGRESS (PART I)

Edited by

E.M. TRUSWELL and J.A. OWEN

Bureau of Mineral Resources Geology and Geophysics, G.P.O. Box 378, Canberra, A.C.T. 2601 (Australia)

CONTENTS

Preface
E.M. Truswell and J.A. Owen (Canberra, A.C.T., Australia) 1
Acknowledgements 4

Keynote Papers
"The historial is a prophet in reverse"
H. Trevor Clifford (St. Lucia, Qld., Australia) 5
Purpose and method in Quaternary palynology
D. Walker (Canberra, A.C.T., Australia) 13

Aerobiology and Pollen Allergens
Regional and global distribution of allergens
Siwert Nilsson (Stockholm, Sweden) 29
Pollinosis in Europe: New observations and developments
Frits Th.M. Spieksma (Leiden, The Netherlands) 35
Airborne pollen monitoring in Italy
G. Frenguelli (Perugia, Italy) and P. Mandrioli (Bolognia, Italy) 41
Tree and grass pollen allergen sensitivity related to atmospheric pollen counts in 1986 and 1987
M.R. Ickovic, M. Thibaudon, G. Peltre and B. David (Paris, France) 45
Aeropalynological and immunochemical data on Fagales pollen grains
J-P. Sutra and G. Peltre, with A. Lapalus, P. Julien, P. Raffaldi, G. Sulmont and J. Lafond (Paris, France) 53
Study of atmospheric pollen by volumetric methods
Masako Sado (Funabashi, Japan) 61
Computer programme for the analysis of airborne pollen, spores and other biological materials
Sudershan Kumar and Doss M. Jinandra (Lucknow, India) 71
Relationship between seasonal and annual total pollen counts of *Cryptomeria japonica* and Cupressaceae and number of outpatients with Sugi pollinosis in central Japan
N. Sahashi, M. Ikuse (Funabashi, Japan), T. Ohmoto, Y. Saito, Y. Tanahashi and H. Takeda (Tokyo, Japan) 79
Standardization of grass pollen allergens: The spectra of pollen allergens from six common grasses
D.J. Bass and B.A. Baldo (St. Leonards, N.S.W., Australia) 87
Parietaria judaica L. — A cause of allergic disease in Sydney: A study of habit and spread of the weed
D.A. Bass (Armidale, N.S.W., Australia) and D.J. Bass (St. Leonards, N.S.W., Australia) 97

The Significance of Pollen Morphology in Biology and Systematics
Studies on pollen morphology of Rosaceae in Canada
Richard J. Hebda (Victoria, B.C., Canada) and C.C. Chinnappa (Calgary, Alta., Canada) 105
Current knowledge and interpretation of the pollen characters in Annonaceae and Leguminosae, Subfamily Mimosoideae
Ph. Guinet (Montpellier, France) and A. Le Thomas (Paris, France) 109
The significance of some pollen morphological characters of the tribe Amorpheae and of the genus *Macuna* (Tribe Phaseoleae) in the biology and systematics of Subfamily Papilionoideae (Leguminosae)
I.K. Ferguson (Richmond, U.K.) 129
Occurrence of simple, tectate, monosulcate or trichotomosulcate pollen grains within the Palmae
Madeline M. Harley (Richmond, U.K.) 137
Spore morphology as a taxanomic data source in *Cyathea* J.E. Smith and *Asplenium* L.
J.E. Braggins and M.F. Large (Auckland, New Zealand) 149

Ontogeny of Pollen Grains
Studies on the ontogeny of the pollinium of a massulate orchid (*Peristylus spiranthes*)
S.Y. Zee and I.H.P. Siu (Hong Kong) 159

Development of pollen grains of *Catharanthus roseus* (Apocynaceae)
Gamal El-Ghazaly (Doha, Qatar) 165
Exine formation in *Cunninghamia lanceolata* (Taxodiaceae)
Marie H. Kurmann (Richmond, U.K.) 175

Methodological Advances in Palynology
Quasi-crystalloid basic molecular structure of the sporoderm
M. Kedves (Szeged, Hungary) 181
Computerized feature analysis of exine sculpture patterns
Edward L. Vezey and John J. Skvarla (Norman, OK, U.S.A.) 187
Computerized identification of pollen grains by texture analysis
M. Langford, G.E. Taylor and J.R Flenley (Hull, U.K.) 197
Where has all the pollen gone?
G. Jennett and J.A.K. Owen (Canberra, A.C.T., Australia) 205
Effect of different treatments on the morphology and size of fern spores
M.F. Large and J.E. Braggins (Auckland, New Zealand) 213
Value for time spent, in palaeopalynology, or with any other fossils
Norman F. Hughes (Cambridge, U.K.) 223

Forensic Palynology
Forensic palynology in New Zealand
D.C. Mildenhall (Lower Hutt, New Zealand) 227

Fine-Resolution Palynology
Fine-resolution pollen analysis of vegetation history in the Lough Adoon Valley, Co. Kerry, Western Ireland
J.R. Dodson (Kensngton, N.S.W., Australia) 235
Models of plant population growth and analogies with reaction kinetics
K.D. Bennett (Cambridge, U.K.) 247

Modern Pollen-Rain Studies
Pollen in the lower Mississippi River
Gail L. Chmura and Kam-Biu Liu (Baton Rouge, LA, U.S.A.) 253
A study of modern pollen deposition, Southern Alps, South Island, New Zealand
P.M. Randall (Christchurch, New Zealand) 263
Pollen-tree relationships within forests of the Robertson-Moss Vale region, New South Wales, Australia
P.G. Kodela (Kensington, N.S.W., Australia) 273
A 10-year pollen trapping record from rainforest in northeastern Queensland, Australia
A.P. Kershaw and K.M. Strickland (Clayton, Vic., Australia) 281

Palynologic/Lithologic Relationships
Differential transport of spores and pollen: A laboratory study
P.L. Holmes (Egham Hill, U.K.) 289
Studies of pollen and spores in rivers and other bodies of water, in terms of source-vegetation and sedimentation, with special reference to Trinity River and Bay, Texas
Alfred Traverse (University Park, PA, U.S.A.) 297
Sedimentology of miospores in the Middle to Upper Devonian Oneonta Formation, Catskill Magnafacies, New York
Andrew Schuyler and Alfred Traverse (University Park, PA, U.S.A.) 305
Miospore lateral distribution in upper Famennian alluvial-lagoonal to tidal facies from western United States and Belgium
Maurice Streel (Liege, Belgium) and Stephen E. Scheckler (Blacksburg, VA, U.S.A.) 315
Usefulness of palynomorph concentrations in distinguishing Paleogene depositional environments in Wyoming (U.S.A.)
Martin B. Farley and Alfred Traverse (University Park, PA, U.S.A.) 325

Palynology and Dry Lands
Quaternary pollen analysis in the arid zone of Australia: Dalhousie Springs, Central Australia
W.E. Boyd (Lismore, N.S.W., Australia) 331
Ecological significance of common non-arboreal pollen: Examples from drylands of the Middle East
Ann P. El-Moslimany (Seahurst, WA, U.S.A.) 343
Vegetational and seasonal climatic changes since last full Glacial in the Thar Desert, Northwestern India
G. Singh, R.J. Wasson (Canberra, A.C.T., Australia) and D.P. Agrawal (Ahmedabad, India) 351
Comparison of pollen and macrofossil based reconstructions of Late Quaternary vegetation in western North America
W. Geoffrey Spaulding (Seattle, WA, U.S.A.) 359
